Many children turn to search engines like Google as their first stop when they go online. Swiggle is a free search engine made for children aged 5-11. It gives young users a safer space to explore the internet and helps them build good online habits, such as:

- Speaking to a trusted adult if something doesn't feel right online
- Reporting unsuitable results through easy-to-use tools.
- Learning safe search skills before using regular search engines

While no search engine can block all inappropriate content, Swiggle offers a much safer alternative to general search engines.
